Skills

Languages: C++, C#

Frameworks: .NET (Core & Framework),
ASP.NET Core (MVC | Web API)

Frontend: HTML5, CSS3, JavaScript, Bootstrap,
jQuery, React(Next.js)

Database: SQL Server, MySQL, SQL & T-SQL,
ADO.NET, EF Core

Design patterns: Provider, Dependency injection,
N-Tier Architecture, Publisher-Subscriber

Operating system: Windows and Linux

Tools: Git & GitHub, Swagger, Postman

Others: Writing clean code, debugging,
OOP, LINQ

Logical Problem Solver: Strong problem-solving skills,
with experience solving over 1,500 software challenges

Languages: Native Arabic, proficient in English

Personal Skills: Creative thinker, Ability to work
under pressure, Good communication skills

Experience

[Programming advices platform](#) : JOB TITLE:

Apprentice in Full-Stack Developer. FROM 21/6/2023 UNTIL NOW

Projects

[API-Weather-Project](#)

(Sep 2025 – Sep 2025)

A modern weather web app using Next.js, React,
and Redux with bilingual support and Material UI.

[Todo-List-Project](#)

(Aug 2025 – Aug 2025)

A clean and responsive Todo List web app with
Material UI and Arabic support.

[Dashboard-Website](#)

(June 2025 – June 2025)

A fully responsive static website template built
with HTML5 and CSS3, including a custom
CSS framework I developed.

Education

University degree: Bachelor's degree in
Information Technology (IT)

Graduation year: 2025/2026

High School Certificate: Scientific Section

The average: Very Good

Graduation year: 2020/2021

Coursework & Certifications

React, Typescript, SASS

HTML, CSS, and JavaScript

SOLID Principles

Introduction to RESTful API

Data Structures Level 2 in C#

Database Level 2 - Concepts & T-SQL

Windows Services

C# Programming Level 2

Full Real Project

OOP As It Should Be In C#

C# - Level 1

C# & Database Connectivity

Database - SQL (Projects & Practice)

Database Level 1 - SQL (Concepts and Practice)

Data Structures - Level 1

OOP as it Should Be (Concepts & Applications)

Algorithms & Problem-Solving Level 1 & 2 & 3 &
4 & 5

Programming Using C++ - Level 1 & 2

All certifications obtained from

[Programming advices platform](#)

International Computer Driving License (ICDL)

Programming & Maintenance of Smart Phones

[Elzero-Website](#)

(June 2025 – June 2025)

A simple, clean, responsive website

Built with html5, CSS3

[Driving-and-Vehicle-License-Department-API](#)

(May 2025 – Present)

A RESTful Web API using C# ASP.NET Core
with a 3-tier architecture, integrated with
SQL Server and MVC.

[Driving-and-Vehicle-License-Department-DVLC](#)

(Dec 2024 - Apr 2025)

A full stack desktop application for managing
local and international driver's licenses.

Tech: C# .NET Framework,
Win-forms, SQL Server, SQL & T-SQL, ADO.NET,
3-Tier Architecture, Publisher-Subscriber design pattern.

[SQL-Query-and-Database](#)

(Oct 2024 – Dec 2024)

A collection of practical SQL scripts demonstrating
fundamental and advanced database operations.

[Bank](#)

(Jun 2024 – Jul 2024)

A C++ console application for managing
banking operations

Tech: C++, Object-Oriented & Functional
Programming, Custom Libraries, text file as database

[Data-Structures](#)

(Apr 2024 – May 2024)

Implemented data structures such as DbLinkedList,
List, Dynamic Array, Queue, Queue Array,
QueueLine, Stack, Stack Array, and Undo-Redo
String using OOP and C++.

CONSOLE PROJECTs:

Bank project using C++

ATM - System using C++

Stone - Paper - Scissor Game using C++

Math Game using C++

CONSOLE LIBRARY PROJECT s:

clsInputValidate library using C++

clsUtility library using C++

clsDate and clsPeriod library using C++

clsString library using C++
